

# Claim 340B-eligible referral prescriptions with ease

## Optimize your 340B savings by capturing 340B-eligible referral prescriptions

When your patients are referred to specialists such as oncologists or infectious disease providers, the resulting 340B-eligible prescription claims can be difficult to track. If ignored, you'll miss out on valuable 340B-eligible savings. ReferDoc® has the solution. Claims that match on the patient filter, but fail to match on the prescriber filter, are held for review by ReferDoc. Once reviewed, these claims can be reprocessed as eligible, improving your 340B savings. Discover how ReferDoc can expand your 340B referral script opportunities and improve your bottom line.

- Easily track referral claims and expand your 340B program
- Expand your overall 340B savings
- Improve tracking of referral prescriptions
- Optimize your specialty pharmacy program
- Achieve dependable 340B compliance

## How ReferDoc® captures 340B-eligible prescriptions to increase your savings

When you refer patients to an outside specialist, the resulting 340B-eligible prescriptions may still be claimed by *your* organization. ReferDoc makes tracking and filing these claims possible in just a few steps. Here's how it works: .

- ReferDoc is housed in your Cumulus® account so it's easy to get started.  
There is no need for more software or add-ons
- Cumulus identifies claims that match on the patient filter
- The claims that fail to match on the prescriber and are held for review
- Your staff reviews these claims and, if eligible, reprocesses them
- Your 340B savings are compliant and optimized
